## Foreword

The Navy-wide Personnel Survey (NPS), which is administered annually, is one part of the Navy Personnel Survey System (NPSS) originated by the Navy Personnel Research and Development Center. The NPSS is designed to manage and control Navy personnel surveys to minimize intrusion into fleet and shore operations and to serve as a vehicle for attitude and survey research. The NPSS is composed of NPS, special surveys, and quick-response surveys. NPS 1991 examined the perceptions of personnel in a variety of areas including rotation/permanent change-of-station (PCS) moves, recruiting duty, pay and benefits, education and leadership programs, quality-of-life programs, organizational climate, and Acquired Immune Deficiency Syndrome (AIDS) education. This information is valuable to managers and policy makers in program formulation and evaluation.

NPS 1991 was conducted under the sponsorship of the Chief of Naval Personnel (PERS-00) within reimbursable work unit 92WRPS522.

This technical note, one of a series documenting the results of NPS 1991, provides the cross tabulation results for enlisted personnel. NPRDC-TN-92-23 provides the cross tabulation results for officers. NPRDC-TN-92-20 provides the graphic presentations of responses of enlisted personnel. NPRDC-TN-92-21 provides the graphic presentations of the responses of officers.

Any questions regarding this report should be referred to Emanuel P. Somer, Head, Survey Research Division, (619) 553-9248 or DSN 553-9248.

## Summary

The second annual Navy-wide Personnel Survey (NPS) was mailed to 23,821 randomly sampled active duty enlisted personnel and officers in December 1991. Completed questionnaires were accepted through mid-February 1992. An adjusted return rate of 57 percent was obtained. Survey topics included rotation/permanent change-of-station (PCS) moves, recruiting duty, pay and benefits, education and leadership programs, quality-of-life programs, organizational climate, and Acquired Immune Deficiency Syndrome (AIDS) education. Responses were weighted to allow generalization of sample results to the Navy population. Responses of enlisted personnel are broken out by paygrade and other important demographic variables.

# Introduction

## Problem

The morale and job performance of Navy members take on added importance in an era of downsizing, where each individual must contribute to the increased efficiency required of a reduced force in a still-hostile world. Navy members' attitudes and opinions represent input vital to the development and continuous improvement of Navy policies and programs; therefore, such opinions must be measured in a systematic and timely fashion, thus furnishing an accurate reflection of the views of its diverse and widespread membership.

## Purpose

The annual Navy-wide Personnel Survey (NPS), initiated in 1990, was designed to systematically collect opinion data and to provide timely information on issues of importance to policy makers. The annual sampling, representative of the entire Navy population, will allow the identification and analysis of trends in opinions and attitudes toward plans, programs, and policies which materially affect Navy members' performance and morale. The survey was also designed to accommodate the study of topics of compelling interest on a one-time basis.

## Approach

NPS questionnaires were mailed in December 1991 to a random sample of 23,821 enlisted personnel and officers with a projected rotation date of March 1992 or later. The sampling represented approximately 3 percent of the enlisted population and 11 percent of the officer population. Of the original sample, 704 surveys could not be delivered. Reminder/thank you postcards were mailed to the entire sample 4 weeks after the surveys. During the 10 weeks the survey was in the field, 13,232 were completed and returned for an adjusted return rate of 57 percent. Table 1 provides the unadjusted return rates for paygrade, total enlisted, and total officer groups.

**Table 1**  
**Return Rates for Paygrade Groups**

Paygrade Group	Population <i>N</i>	Surveys Sent	Percent Return <sup>a</sup>
<b>Enlisted</b>			
E-2 and E-3	125,849	4,703	22
E-4 through E-6	302,769	9,155	52
E-7 through E-9	51,930	1,874	79
Total	480,548	15,732	46
<b>Officers</b>			
W-2 through W-4	2,913	1,152	81
O-1 through O-3 <sup>b</sup>	43,248	4,065	66
O-4 through O-6	26,360	2,872	80
Total	72,521	8,089	73

<sup>a</sup>Percent return was calculated without adjusting for surveys that could not be delivered.

<sup>b</sup>Includes O-1E through O-3E.

The survey requested demographic information and measured military members' attitudes and opinions in various areas, including rotation/permanent change-of-station (PCS) moves, recruiting duty, pay and benefits, education and leadership programs, quality-of-life programs, organizational climate, and Acquired Immune Deficiency Syndrome (AIDS) education. Of the 230 questions in NPS 1991, 138 were also in NPS 1990.

This technical note provides the 1991 results in cross tabulation tables for enlisted personnel, while a companion technical note (Wilcove & Quenette, 1992) provides officer cross tabulation tables. Additional technical notes (Quenette, Gordon-Espe, Eliassen, Kalus, Hase, & Brinderson, 1992a, 1992b) contain graphic presentations of enlisted and officer responses.

The cross tabulation tables are based on weighted data. Responses were weighted by paygrade to reflect each paygrade's actual proportion in the Navy, thereby allowing generalization of sample results to the entire Navy. Separate weighting schemes were employed for enlisted personnel and officers; within the enlisted/officer groups, each paygrade was weighted separately.

For statistical analyses, officers were assigned to one of three groups: (1) W-2 through W-4, (2) O-1 through O-3 and O-1E through O-3E, and (3) O-4 through O-6. Enlisted personnel were grouped as follows: (1) E-2 and E-3, (2) E-4 through E-6, and (3) E-7 through E-9. E-1s were excluded because of their limited time in the Navy.

## **Organization**

The sequence of cross tabulation tables in this technical note corresponds to the sequence of the questions in NPS 1991. (A copy of the NPS 1991 appears in the appendix.) For questions that allow the respondent to select a "Does Not Apply" option, the results are displayed with and without that option. In addition, some questions were broken out, not only by paygrade, but by other demographic variables, and those results are displayed as well.

## **Margin of Error**

The cross tabulation tables show the percentages of (weighted) subgroups selecting each response option. Tabulated results are accurate within the margins of error displayed in Table 2. For example, for the E-2 and E-3 paygrade grouping, the true population percentage could be as much as 3 percent higher or lower than the value displayed in the tables. Small sample sizes yield unstable results. For example, only 33 Asians (Table 2) completed the survey, with a margin of error of 17 percent. In such situations, all conclusions and interpretations should be considered tentative.

## How to Read the Cross Tabulation Tables

The information contained in each cross tabulation table is described in Figure 1.

1. Question number and paraphrased text of question.
2. Respondent groups.
3. Response options.
4. Count: Weighted count of responses.
5. Row Percent: For a given option, the row percent provides the distribution of responses across the (weighted) respondent groups.
6. Column Percent: For a given (weighted) respondent group, the column percent provides a distribution of responses across response options.
7. Total number of respondents (weighted) selecting option.
8. Percent of all respondents (weighted) selecting option.
9. Total number of respondents.
10. Total number (weighted) of respondents in group.
11. Percent of all respondents in (weighted) group.
12. Number of respondents (weighted) who omitted question.
